## IMPORTANT TIPS:

**1). ADDRESS** - When entering your payment information, it pertains to the Credit or Debit Card you are using. This could be different from the Property Location shown on the left for the account you are paying. **BE SURE TO ENTER THE ADDRESS WHERE THE CREDIT OR DEBIT CARD STATEMENTS ARE MAILED FOR THE CARD YOU ARE USING.**

**2). ZIP CODE** - This again, is the zip code associated with the credit or debit card. If you enter the wrong Zip Code for the card you are using it could place a temporary hold on the funds in your account, even though the payment is denied. **BE CAREFUL to use the correct zip code of the card where the statements are mailed.**

This address could be different than the address associated with the credit or debit card you are using. On the left, please enter mailing address and zip code information for the card you are using to pay this bill with.

Why does my bank account show the payments has been made twice?

If this happens, please call our office. **(570) 323-6148**. We can quickly confirm for you if we have received the duplicate payment, or if it is a temporary hold due to an error with either the address or the zip code entered.

**Please do not attempt to make your payment more than twice if it is denied.**
